

# The contents of the box

Spade connectors fit  
original harness

Drilled holes in dust-cover for the harness. Finished it of with a hack-saw and steel file.

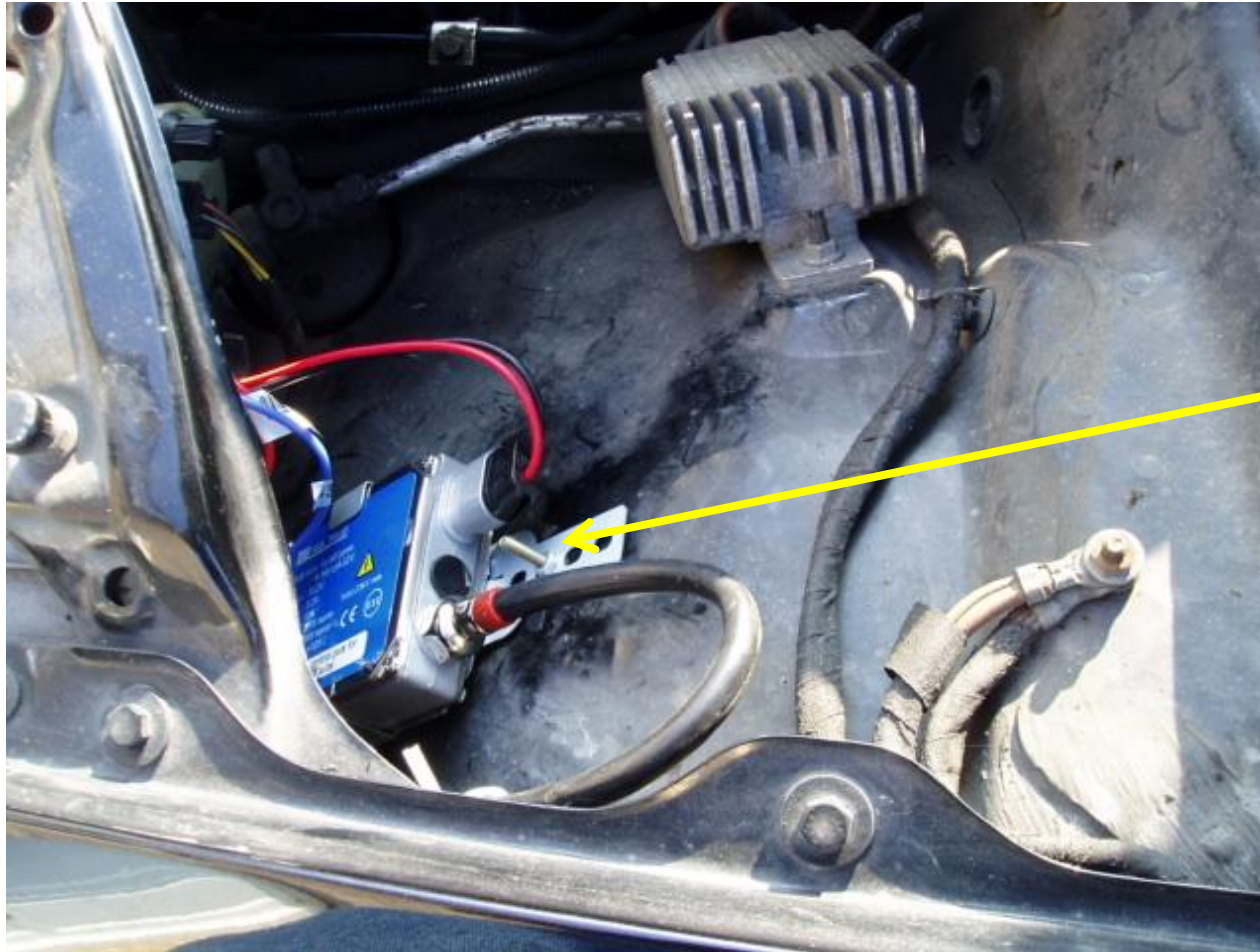

Drilled 24mm hole  
just large enough for  
harness lead to fit  
through

# The new installation

Rubber grommet in place, with harness ends within the dust cover.

# Ballast fitted to the passenger side

Drilled 1 hole  
through wheel well  
to attach ballast.

Second ballast fits snugly next to air box on driver's side

# Comparison

Before

After

Now I need to adjust them.
