

SI35.31-P-0002A	Service Information: Rear axle gear	3.7.02
-----------------	-------------------------------------	--------

MODEL 211

Since 04.11.2001 all rear axle gears, size Ø 185, Ø 187FE, Ø 198, Ø 210E have been filled in series production with a newly developed, more efficient, synthetic fill-for life oil (universal hypoid gear oil, SAE 75W-85).

Designation: Titan EG 50 10 D
Part number: A 001 989 33 03 10 (1 l can)
Manufacturer: Fuchs Europe GmbH, Mannheim

In production the use of this oil starts as of rear axle gear serial number:

Rear axle gear size serial number

- Ø 185 3 599 191
- Ø 187FE 1
- Ø 198 1 451 082
- Ø 210E 442 288
- Ø 240V 1756 (conversion on 12.02.2002)

 The fully synthetic oil can also be used without reservation for rear axle gears manufactured before 04.11.2001.

 **A mixture** of old and new oil would not affect the basic functions, such as wear resistance, leak tightness etc. of the rear axle gear, **should** however, **be avoided** because of the better fuel economy behavior.
